PROFILE SUMMARY

I am a highly motivated and curious Data Analyst enthusiast, dedicated to leveraging my strong academic foundation in data analytics, statistics, and problem-solving skills. I have completed hands-on projects and certifications in data analysis using Python, SQL, Excel, and Tableau, which demonstrate my ability to extract actionable insights from raw data. My passion lies in uncovering hidden patterns and trends within data to facilitate informed decision-making

CERTIFICATIONS&PROJECTS

Coursera
Developing AI Application with Python
and Flask

- Developed an AI-powered web application using Python and Flask, integrating machine learning models for real-time predictions. Designed a clean user interface, handled backend logic with RESTful APIs, and implemented data preprocessing and model deployment using libraries like scikit-learn and pandas.

Coursera
Migrating to the AWS Cloud

- Assisted in migrating applications and data to the AWS Cloud, focusing on services like EC2, S3, RDS, and IAM. Gained hands-on experience in setting up cloud infrastructure, configuring security, and optimizing performance for scalability and reliability.

Project
HR Analytics Dashboard

- This dynamic solution transforms raw employee data into actionable strategic insights covering Total Headcount, Attrition rate Active Employees, Average age. Furthermore, user can dynamically analyze all key metrics and charts based on the employee's specific field.
